-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Back (US Pat. 5,772,778).

See the attached marked up drawing figures 1-3 of Back depicting the claimed features.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 5, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weiselfish et al. (US Pat. 4,700,633)

Art Unit: 3651

Weiselfish et al. teach a drive transferring member(see marked up copy of attached figure 4 of Weiselfish et al.) on one rail utilizing an RF transmitter on an axle of a drive transferring member (see marked up copy of attached figure 6 of Weiselfish et al.). Weiselfish et al. fail to teach the 3 or more rails with an aperture within the rails. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide one of many well known transfer rail systems (such as one rail as taught by Weiselfish et al., or 4 rails as taught by Back above, or two rails as taught by cited prior art references) since the examiner takes Official Notice of the equivalence of rail systems for conveying in the mechanical arts and the selection of any of these well known equivalents to that of the applicant would be well within the level of ordinary skill in the art. Since claims 5 and 6 generically claim an RF system that does not appear to be dependent upon the 3 or more rail system of the applicants, claims 1, 5, and 6 do not provide a patentable departure from the device of Weiselfish et al.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A Hess whose telephone number is 703-308-3428. The examiner can normally be reached on M-Thurs 5:30 - 4:00.
